THE FUTURE IN IMAGES

COMPETITIVE OPEN ACCESS CALL REDIB-2501

The Open Call offers a complete translational research portfolio with logistical advantages and attractive prices.
Services include: Molecular, functional, multimodal, sequential imaging studies, radiochemistry, and nanofabrication.
In addition, advanced microscopy, image acquisition techniques, high-throughput detection, BSL2 cell culture laboratories, and accredited animal facilities with housing and surgery operating rooms are available.

Reception of research proposals until April 30th

APRIL 2025

VOL 5

IMAGE FOR EVERYTHING AND EVERYONE

ReDIB nodes embrace fourteen essential facilities and forty-nine biomedical/biological technologies, comprising a wide range of imaging studies that scale from molecules to subjects.

ReDIB supports researchers, from academy to industry, to develop projects at molecular, cellular, organ, and organism levels, using the latest technology and highly skilled scientific and technical personnel.

Advanced Infrastructure for Translational Imaging
NATIONAL CENTRE FOR CARDIOVASCULAR RESEARCH CARLOS III (CNIC, MADRID).

Platform for Molecular and Functional Imaging CIC-biomaGUNE
CENTRE FOR COOPERATIVE RESEARCH IN BIOMATERIALS (DONOSTIA-SAN SEBASTIAN).

PREBI-GIBI230 Infrastructure (Imaging La Fe)
UNIVERSITY AND POLYTECHNIC LA FE HOSPITAL(HRI LA FE, VALENCIA)

Complutense Bio-Imaging Center, BioImaC
BIO-IMAGE UNIT AT THE COMPLUTENSE UNIVERSITY OF MADRID (BIOIMAC,MADRID)

AN OPPORTUNITY TO BOOST YOUR SCIENCE

Access to optimized cutting-edge imaging services at cost-effective rates.

A staff that offers ongoing guidance and a short response time to users.

Access to scientists, technicians, and imaging experts, to tackle the full potential of advanced imaging facilities.

Access to imaging technologies that could be adapted to specific research project requirements.

- Friendly and updated access-protocol
- Different services modalities
- Access to new image acquisition and data analysis protocols
- Access to certified facilities ensuring reproducible data
- Access to opportunities for novel collaborations with imaging networks

4 Research nodes

16 Unique equipments

49 Biomedical biological technologies
